PLATEAU

Growing from level to level

I had a vision – quite a big one. Back in 2016, my vision was clear and simple: to rethink elements in urban spaces with regards to social interaction, usability, materials, and to top it all, the integration of technology to make a better living for all people.

I fulfilled my vision in cooperation with Holscher Design, and since then out-sider gave birth to a range of outstanding designs.

They are all based on the same DNA and philosophy with simple but characteristic shapes. The Plateau family is a reality. My dream came true.

THE DESIGNERS – HOLSCHER DESIGN

**Holscher
Design**

Holscher Design is one of Scandinavia's most recognized and award-winning design studios, with more than 25 years of experience. Their collaboration with out-sider began with a design competition concerning the development of radical new table/bench set for public spaces, where their winning proposal – Plateau Picnic – was chosen.

The design has iconic and graphic qualities, while being a coherent, innovative piece of furniture with many seats in socially oriented formations – inviting people to interact with each other. Holscher Designs intention was to create a product family. We now welcome the new family members.

THE HPL MATERIAL

A bench made of paper

“We source these raw materials from vendors certified according to the standards FSC® or PEFC. These standards ensure that the wood is produced in compliance with internationally applicable rules for sustainable forestry.”

COLOURS

HPL stands for 'high pressure laminate'. With sustainability in mind, our laminate panels are made from wood processed into "kraft papers". This wood is a by-product of sawn lumber from sawmills.

50 such kraft papers are compressed together with a resin to create our 12mm laminate panels.

The Plateau-series is built for longevity. Originally, the HPL material was developed for decorating building facades. As such, the material tolerates changes in weather conditions, is waterproof and can be outdoors 365 days a year.

The panel is robust, has a sleek, exclusive look, and is easy to maintain. After its 30+ year service cycle has ended, the panel can be chopped to pieces, and disposed of thermally without the emission of environment harming toxins.

The frame is made of galvanized steel further emphasizing Plateau's robustness, while preserving elegant and clean look. Highly UV- and weather-resistant, solid mechanical quality and durability. Plateau's materials require no maintenance other than soap and water.

Our HPL panels come in two surface variants, a textured surface and a smooth surface. Regardless of what variant is chosen, HPL comes in a variety of color options. Both variants are pleasant to the touch – in winter it's not cold, and in summer it's not scolding hot.

PICNIC

Come together

Plateau Picnic is the ‘mother’ of the Plateau-family, the embodiment of the Plateau series design values. A stringent and graphical piece of furniture, where the dimensions of the design allows for 8-12 seats in a socially oriented formation. Three variants of Plateau Picnic available, suitable for all age groups and user needs.

PICNIC O+I+L

PICNIC BACKREST

Lean back

All models have been prepared for the backrest. It is possible to fit a backrest to both sides of the Picnic. The backrest is manufactured in the same color variants as the Picnic.

SUNHUB

Power to the People

The Picnic has been prepared for “tech extras”. Our tech extras use the same interface as the 2 dics on the Picnic.

Regular cleaning of the solar panel is advised to maximize functional capacity.

SunHub elevates Plateau Picnic to another level. SunHub adds a third 'plateau' to the furniture, enabling new technical features and new application possibilities.

With SunHub, Plateau Picnic becomes more than just a piece of furniture, it becomes a social 'hub'. It allows people to listen to music via built-in speakers and Bluetooth connection, charge their phones wirelessly or by cable and PC-charging.

During the evening hours, light from the SunHub grazes the tabletop, creating a cozy atmosphere. The SunHub is 100% solar-powered, resistant to weather conditions, intelligently controlled and CO2-neutral.

TECHHUB

Power to the People

Just like SunHub, the TechHub adds another layer of user interactions and application areas to the Picnic table. Where SunHub is solar-powered, the TechHub is powered by cable (230V) allowing for indoor and outdoor use. TechHub features four wireless chargers and has the same powerful Bluetooth speaker setup and cabled charging options as SunHub. TechHub comes in the same color variants as the Picnic table/bench set and is resistant to all weather conditions.

POINT SUN

Light up the darkness

Mount Point Sun on top of Picnic and the light will automatically turn on at dusk. Because of the integrated solar cells and electronics, Point Sun is 100% energy self-reliant and therefore CO₂-neutral. The unit works all year around and conserves energy during winter, by dimming down.

BENCH & PLINTH

The city's respite

The bench and plinth have their clear origins in the original Plateau Picnic. The simple design and the 2.8m long seat provide plenty of seating, as well as the possibility for people to group at each end. The unique design provides seating for 5-6 people. Suitable for all age groups.

The virtually maintenance free bench and plinth are perfect for public spaces where their curved and elegant lines complements the architecture and the urban space

BENCH & PLINTH

Side-tables can be mounted in different positions and be used as a table and/or armrest. Same material and color as bench/plinth; durable and made to last.

By combining bench and plinth in different ways, it is possible to create a variety of solutions both functional, aesthetical and social. Simply put, you can create inner space in outer space.

SEAT

Be together

Seats represent the essence of the Plateau family. It 'floats' close to the concrete surface and pleasantly breaks the rectangular structure of the urban space. Depending on the seat size, it accommodates 1-4 people and side-tables can be fitted on all versions.
